Benefits in detail

This plan provides you with the potential to grow your savings with market linked returns along with an adequate life insurance cover to protect the financial goals of your loved ones with 2 plan variants - Wealth and Assure.

A. Wealth

Maturity Booster

As you pay your due premiums, the premiums grow at a rate (based on the performance of the fund(s)) when allocated in your choice of fund(s).

Under this policy, on survival of the person whose life is covered by this policy (known as the life assured) till the date of maturity, provided the policy has not already terminated, you will receive the Fund Value.

On payment of maturity benefit, the policy will terminate and all rights, benefits and interests under the policy will be extinguished.

This maturity benefit includes "Maturity Booster" and "Return of Policy Administration Charges" as explained under "What makes ICICI Pru EzyGrow a cost-effective ULIP for you?"

Illustrative example: Mr. Akshay, a 30-year-old banker, wants to save in a plan that can potentially provide high returns for a sufficient corpus for his long-term financial needs. He wants to invest ₹ 100,000 annually.

ICICI Pru EzyGrow provides the perfect solution for his needs.

Akshay decides to stay invested for 40 year policy term to enjoy the benefits of compounding. During this term, he will be paying ₹ 1,00,000 annually for 10 years, i.e. a total of ₹ 10 Lakh and has opted for Wealth plan variant.

On Akshay's survival till policy maturity, provided he has paid all due premiums, he will get a lump sum corpus as the Maturity Benefit (i.e. Fund Value), as given in the table below:

Since the fund value depends on the performance of the fund, we have assumed that 100% of the premiums are paid in India Consumption Fund.

Assumed investment returns	8% p.a.	4% p.a.
Fund Value at Maturity (in ₹)	87.72 lakh	23.21 lakh

The returns shown above i.e. at 4% p.a. and 8% p.a. are not guaranteed and they are not the upper or lower limits of what Mr. Akshay might get back, as the fund value depends on a number of factors including future investment performance. The above-mentioned returns are for illustrative purposes.

Akshay will also have a minimum life cover (Sum Assured) of ₹ 10 Lakh under this policy, during the entire Policy Term.

Death Benefit:

If the life assured passes away during the policy term provided all due premiums have been paid, death benefit will be paid out as a lump sum to the claimant, provided the policy is in-force and the monies are not in the Discontinued Policy Fund.

Death Benefit (life insurance benefit) payable will be highest of:

- Sum Assured, including top-up sum assured, if any or
- Fund Value of this policy as available on date of intimation of death or date of foreclosure or date of maturity whichever is earlier or
- Minimum Death Benefit

In the event of death of the Life Assured on the Date of Maturity, only the Maturity Benefit (if applicable) is payable and the Death Benefit shall not be payable.

As you avail the facility of Top-up, your Sum Assured correspondingly increases by a Top-up Sum Assured. Wherever Top-up is availed, Fund Value includes Top-up Fund Value. For more information on top-up please refer clause 5 under “Flexibilities available under ICICI Pru EzyGrow”

Annualized Premium is the premium amount payable in a year excluding the taxes, rider premiums and underwriting extra premium on riders, if any.

Minimum Death Benefit will be 105% of the total premiums paid including Top-up premiums, if any, up to the date of death.

On death of the life assured, during the policy term, while the monies are in discontinued policy fund, Death Benefit will be the proceeds of the Discontinued Policy Fund applicable to your policy.

On payment of Death Benefit, the policy will terminate and all rights, benefits and interests under the policy will be extinguished.

B. Assure Variant

Maturity Booster

On date of maturity, the fund value will be payable as the maturity benefit to you, provided the policy has not already been terminated.

Maturity Benefit will be payable irrespective of the survival of the life assured on the date of maturity. In the event of the death of the life assured prior to or on the date of maturity, then the Maturity Benefit shall be payable to the claimant. On payment of maturity benefit and the last instalment of the Family Income benefit, if any to the Claimant, the policy will terminate and all rights, benefits and interests under the policy will be extinguished.

If the life assured survives till the date of maturity then this maturity benefit includes “Maturity Booster” and “Return of Policy Administration Charges” as explained under “What makes ICICI Pru EzyGrow a cost-effective ULIP for you?”

Death Benefit:

On the death of the life assured during the policy term provided all due premiums have been paid and the monies are not in the discontinued policy fund, death benefit will be payable to the claimant. Death Benefit will comprise of the following two parts:

- a. Lump sum Benefit, and
- b. Smart Benefit

Let us understand through an example:

Illustrative example: Akshay, a 30-year-old banker, wants to save in a plan that can potentially provide high returns for a sufficient corpus for his family's long-term financial needs. ICICI Pru EzyGrow provides the perfect solution for his needs and ensures family's goals are assured irrespective of his survival during the policy term.

Akshay decides to stay invested for a long-term and enjoys the benefits of compounding and chooses a 25-year policy term. During this term, he will be paying ₹ 1,00,000 for 10 years, i.e. a total of ₹ 10 Lakh and has opted for Assure plan variant.

He has opted for 10% Family Income benefit.

On Akshay's survival till date of maturity, provided he has paid all due premiums, he will get a lump sum corpus as the Maturity Benefit (i.e. Fund Value), as given in the table below:

Since the fund value depends on the performance of the fund, we have assumed that 100% of the premiums are paid in India Consumption Fund.

Premium Payment Term: 10 years

Annual Premium: ₹1,00,000

Total Premium Paid: ₹ 10,00,000

Policy Term: 25 years

Assumed investment returns	8% p.a.	4% p.a.
Fund Value at Maturity (in ₹)	31.93 lakh	14.33 lakh

The returns shown above i.e. at 4% p.a. and 8% p.a. are not guaranteed and they are not the upper or lower limits of what Mr. Akshay might get back, as the fund value depends on a number of factors including future investment performance. The above-mentioned returns are for illustrative purposes.

On payment of maturity benefit, the policy will terminate and all rights, benefits and interests under the policy will be extinguished. In the event of the death of the life assured prior to or on the date of maturity then the maturity benefit shall be payable to claimant.

Akshay is worried about his family's future goals in case of his unforeseen demise during the policy term. Let's see how the product helps secure his family's dreams and aspirations:

Akshay will have a minimum life cover (Sum Assured) of ₹ 10 Lakh under this policy, during the entire Policy Term.

On Akshay's death during the policy term, provided all due premiums have been paid and the monies are not in the discontinued policy fund, a lump sum benefit will be payable to the Claimant, which will be the higher of:

- a) Sum Assured, including Top-Up Sum Assured, if any
- b) Minimum Death Benefit

In case of Akshay's unfortunate demise in the fifth policy year, a lump sum benefit of ₹ 10 Lakh will be paid out to Akshay's wife (assuming Akshay's wife is the Claimant).

We shall also waive all future premiums payable under the policy after the date of death and will allocate units equivalent to instalment premium into the policy, as and when due.

This benefit shall be called "Future Secure Benefit" and shall comprise a part of the "Smart Benefit".

The policy shall continue till the date of maturity with fund value paid out to Akshay's wife.

Additionally, for her supplementary income needs, Akshay's wife shall also receive an income of ₹ 1,00,000 subsequent to his death every year on policy anniversary till the end of the policy term.

This benefit shall be called “Family Income Benefit” and shall again comprise a part of the “Smart Benefit”.

Kindly refer Terms & Conditions clause 5 for details on this benefit.

What makes ICICI Pru EzyGrow a cost-effective ULIP for you?

To provide you life insurance cover, a certain charge called mortality charge is deducted from the premiums that you pay by redemption of units before allocating them to the funds. Similarly, other charges known as policy administration charge (for administration of your policy) and fund management charges (for management of funds) are also deducted every month. Please refer to the section on 'Charges in the Policy' mentioned later in the document to know more.

Maturity Booster

Maturity Booster will be allocated as extra units at the end of the policy term where life assured survives till the date of maturity and provided all due premiums have been paid.

The Maturity Booster will be equal to 0.1% of the average of the Fund Values on the last business day of the last eight policy quarters.

Maturity Booster will be allocated among the funds in the same proportion as the value of total units held in each fund at the time of allocation

Return of Policy Administration Charges

This benefit is applicable only when life assured survives till the date of maturity and provided all due premiums have been paid. At maturity, an amount equal to a multiple of total policy administration charges deducted in the policy net of taxes will be added back to the fund value.

The multiple of return of policy administration charge would vary depending on the variant, premium payment term and policy term, and is as given below:

Premium payment term/ Policy term	Wealth		Assure
	<20 years	≥ 20 years	All PTs
< 10 years	1x	1.5x	2x
≥ 10 years	1x	2x	2x

Units equivalent to a multiple of policy administration charges as stated in the above table will be allocated between the funds in the same proportion as the value of total units held in each fund at the time of allocation

Zero Premium Allocation Charges

To get you kick started with your savings journey, we will allocate the entire premiums that you pay without deducting any premium allocation charges.

Let's understand the plan through an example.

Illustration:

Mr. Siddeshwar is a 30 year old, who is looking for a plan that can give him the opportunity to get market-linked returns.

Premium payment option: Limited Pay – Limited term

Premium payment mode: Annual

Amount of instalment premium: ₹ 50,000

Sum Assured: ₹ 5,00,000

Premium payment term: 10 years

Policy term: 20 years

Total premium paid: ₹ 5,00,000

Plan variant: Wealth

Since the fund value will depend on the performance of the fund, we have assumed that 100% of the premiums are paid in India Consumption Fund and the fund returns are also assumed at 4% p.a. and 8% p.a.

Assumed investment returns	8% p.a.	4% p.a.
Fund Value at Maturity (in ₹)	13,12,412	7,34,903

The returns shown in the benefit illustration i.e. 4% p.a. and 8% p.a. are not guaranteed and they are not the upper or lower limits of what Mr. Siddeshwar might get back, as the value of his policy depends on a number of factors including future investment performance.

Mr. Siddeshwar also has the option to receive the maturity benefit i.e. the Fund Value in the form of regular income for a period of one to five years instead of a one-time lump sum. Please refer to Clause 6, Settlement Option under Additional flexibilities for more details.

2. Partial Withdrawal Benefit

This facility is designed to help you provide liquidity so that any immediate financial need can be met. You can avail this any time after the completion of five policy years, provided the monies are not in the Discontinued Policy fund. You can make partial withdrawals as long as the total amount of partial withdrawals in a year does not exceed 20% of the Fund Value in a policy year. The partial withdrawals are free of cost.

You can make partial withdrawals after completion of lock-in period and payment of five full year's premiums and if the monies are not in Discontinued Policy Fund. . In the case of policies on minor lives, partial withdrawals shall not be allowed until the minor life insured attains majority i.e. on or after attainment of age 18.

For the purpose of partial withdrawals, lock in period for the Top-up premiums will be five years or any such limit prescribed by IRDAI from time to time. Partial withdrawals will be made first from the Top-up Fund Value (if any) which has completed the lock in period of 5 years from the respective date of payment of Top-up premium,, as long as it supports the partial withdrawal, and then from the Fund Value built up from the base premium(s).

You can withdraw a minimum amount of ₹2,000 on each withdrawal.

You can continue with partial withdrawals till the Fund Value reaches three times of the annualized premium. The partial withdrawals shall not be allowed which would result in termination of a the Policy.

Further, you also get the facility to withdraw a pre-determined percentage of your fund value regularly through your own Systematic Withdrawal Plan (SWP). This can help you to meet specific needs such as child's education or money for day-to-day expenses during retirement.

You can choose to receive the regular payouts monthly, quarterly, half-yearly or yearly, on a specified date. The first payout is made on the withdrawal start date specified by you.

For example, if you choose 6% p.a. of the fund value to be withdrawn yearly, then an amount equal to 6% of the fund value would be paid on the chosen date every year.

Please refer to Clause 4, Systematic Withdrawal Plan under Terms and Conditions for more details.

3. Choice of four portfolio strategies

You have a choice out of four portfolio strategies to save your money as per your risk appetite. You can have your funds in any one of the following strategies. These are given below in detail.

a) Target Asset Allocation Strategy

This strategy enables you to choose an asset allocation that is best suited to your risk appetite and maintains it throughout the policy term.

You can allocate your premiums between any two funds available with this policy, in the proportion of your choice. Your portfolio will be rebalanced every quarter to ensure that this asset allocation is maintained.

The re-balancing of units shall be done on the last day of each Policy quarter. If the last day of the quarter is a non-working day, then the next working day's NAV (i.e. the price per unit of the Fund) will be applicable.

b) Trigger Portfolio Strategy 2

Maintaining a pre-defined asset allocation is a dynamic process and is a function of constantly changing markets. The Trigger Portfolio Strategy 2 enables you to take advantage of substantial equity market swings.

Under this strategy, your savings will initially be distributed between two funds Multi Cap Growth Fund, an equity oriented fund, and Income Fund, a debt oriented fund in a 75%: 25% proportion. The fund allocation may subsequently get altered due to market movements. We will re-balance funds in the portfolio based on a pre-defined trigger event.

Working of the strategy:

- The trigger event is defined as a 10% upward or downward movement in NAV of Multi Cap Growth Fund, since the previous rebalancing. For determining the first trigger event, the movement of 10% in NAV of Multi Cap Growth Fund will be measured vis-à-vis the NAV at the inception of your strategy.
- On the occurrence of the trigger event, any fund value in Multi Cap Growth Fund which is in excess of three times the Income Fund, fund value is considered as gains and is transferred to the liquid fund - Money Market Fund by cancellation of appropriate units from the Multi Cap Growth Fund. This ensures that gains are capitalized, while maintaining the asset allocation between Multi Cap Growth Fund and Income Fund at 75%:25%
- In case there are no gains to be capitalized, funds in Multi Cap Growth Fund, Income Fund and Money Market Fund are redistributed in Multi Cap Growth Fund and Income Fund in 75:25 proportion.

c) Fixed Portfolio Strategy

This strategy enables you to manage your savings actively. Under this strategy, you may choose to save your monies in any of the fund options (as detailed in Clause 1, Choice of Funds above) in proportions of your choice. You can switch monies amongst these funds using the switch option.

Within the Fixed Portfolio Strategy you also have the option to select Automatic Transfer Strategy (ATS). It is not compulsory for the policyholder to select the Automatic Transfer Strategy. If this is chosen you can save all or part of your savings in Secure Opportunities Fund, Money Market Fund, Income Fund and/or Constant Maturity Fund and transfer a fixed amount in regular instalments into one or more of the following funds: Bluechip Fund, Maximiser V, Multi Cap Growth Fund, Maximise India Fund, Value Enhancer Fund, Opportunities Fund, Focus 50 Fund, India Growth Fund, Balanced Advantage Fund, Sustainable Equity Fund, Mid Cap Fund, Mid Cap Hybrid Growth Fund, Mid Cap Index Fund, Mid Cap 150
